Vario•Tec

Accessory jaws for your 6" KURT vise.
Movable pins allow quick setup changes for different work pieces without having to exchange jaws.
No need for parallels or other expensive devices.

Pins are extended by compressed air

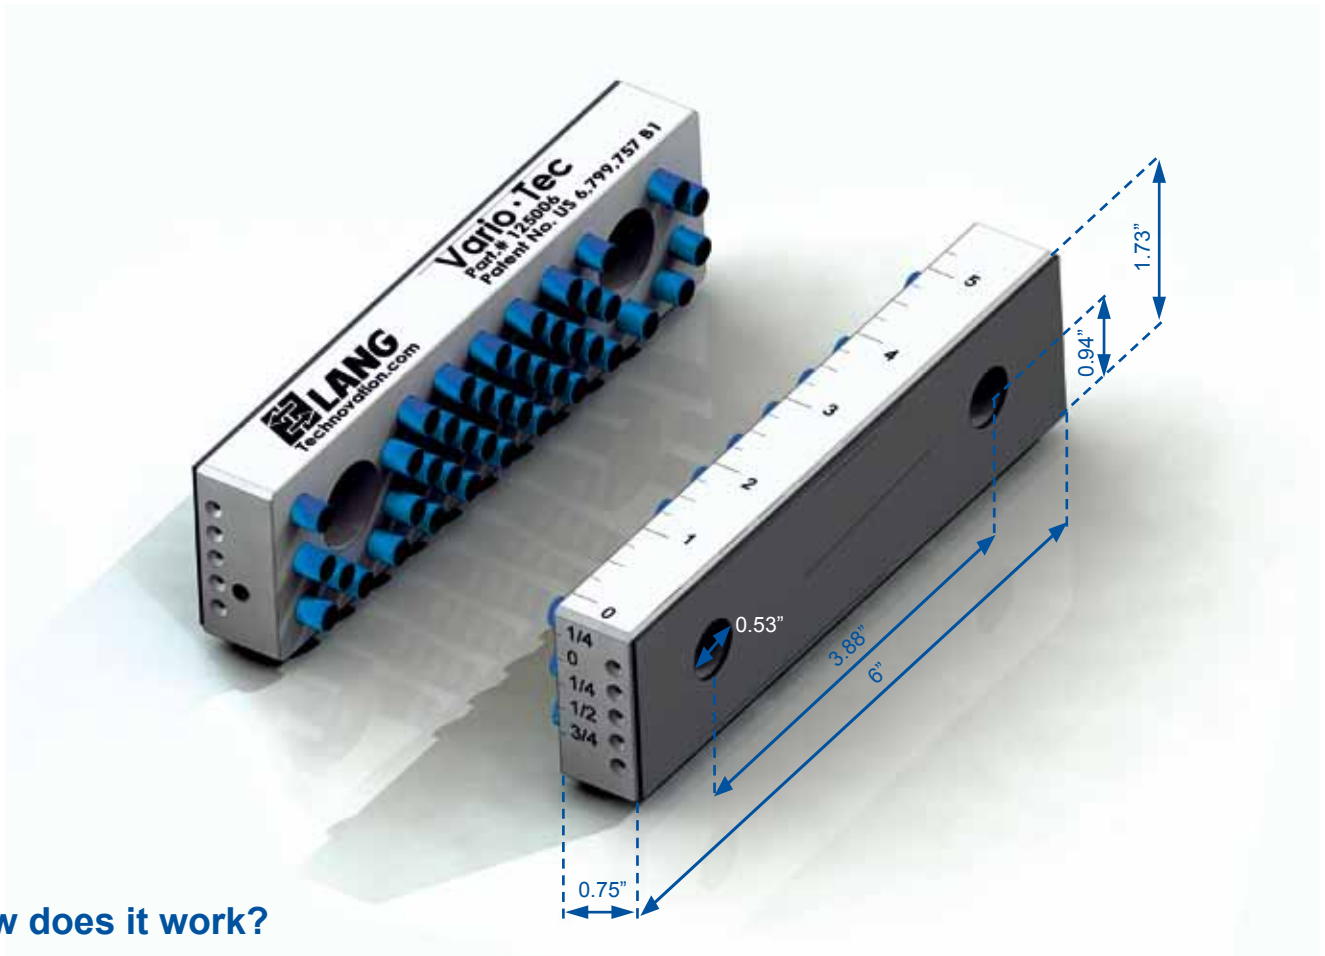

No more damage to parallels while drilling and milling close to the jaw

Easy locating and clamping of work piece

Vario•Tec – Movable pins make expensive devices and parallels obsolete

- 6" KURT vises can be retrofitted with Vario•Tec
- Work pieces can be set up quickly in different positions
- Not needed pins can easily be pushed back into the jaws
- 45 degree angle can be achieved by pushing in specific pins
- Pins can be set as an endstop
- Advantages: time-saving, safe milling, better quality and higher repeatability

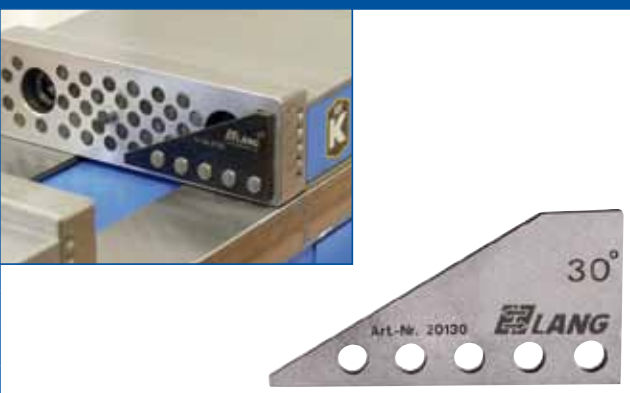

How does it work?

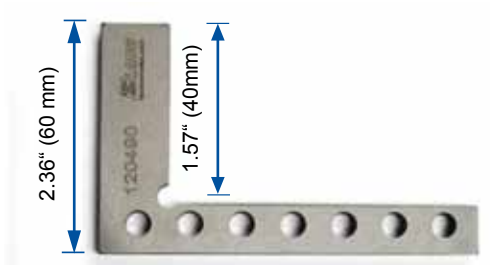

The pins can be extended row by row by compressed air and if not needed the pins can be pushed back easily. A 45 degree angle can be achieved within seconds just by pushing specific pins into the jaws.

Vario•Tec set * / Single jaws				
	Description/Type	Order No.	Qty.	Price
	Set of Vario•Tec jaws for KURT vise + 1 air pistol + 2 sealing plates + Alignment plate with screw + 5 spare pins	125210	1 Set	
	1 jaw fixed + Sealing plate	125211	1	
	1 jaw movable + Sealing plate	125212	1	
Vario•Tec jaws for KURT vises: D 675 / DM 675 / D 688/ DM 688 and other models. Distance between mounting holes 3.88"				

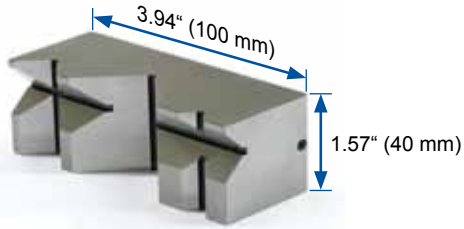

* Spare parts upon request.

Angle plates for positioning work pieces in defined angles, hardened, length 2.83" (72mm)				
	Description/Type	Order No.	Qty.	Price
	5°	120105	1 pair	
	10°	120110	1 pair	
	15°	120115	1 pair	
	20°	120120	1 pair	
	25°	120125	1 pair	
	30°	120130	1 pair	
	35°	120135	1 pair	
	40°	120140	1 pair	
	45°	120145	1 pair	

90° plate, hardened, 0.197" (5 mm) thick				
	Type	Order-No.	Qty.	Price
	For accurate positioning and support of work pieces larger than the height of the jaws.			

Prism, standard
